## Fire Pits

**DEGREE OF DIFFICULTY**

**Planning:**  
*Detailed*

**# of Materials:**  
*Moderate*

**Do-It-Yourselfers:**  
*1 to 2 workers*

**Exertion:**  
*Repeated lifting*

**Tools/Equipment:**  
*See checklist on back*

### *Before You Begin...*

- **CALL BEFORE YOU DIG:** In Indiana, call 8-1-1 at least two full working days before you plan to excavate the project site. Your local utilities will mark the underground utility lines so you can more safely dig in the area. For more information, visit <http://indiana811.org/>.
- Make sure you understand and comply with any local ordinances or HOA restrictions that may impact your project.
- Make sure you and your recruits have the physical strength and agility to perform the work. If you need help with more challenging aspects of the job, get the additional tools, equipment or manpower you need. Projects can be fun with the right resources!
- Draw a map of the project area and document the dimensions so your Green Stone professional can help you determine the right amount of materials needed to complete your DIY project.

A fire pit adds functional style to your patio, and can extend your outdoor season by warming those cool autumn days and nights. Invite your friends to gather around the fire as you keep the party going outdoors even after summer fades.

Building a fire pit is relatively easy for the do-it-yourselfer. All you need is a good plan, a few tools, a helping hand if available, and some gorgeous stone from Green Stone! With these resources available, you could have your fire pit built and ready for action in about a weekend.

How do you get started? First, use the back of this information sheet to sketch your project area and document the dimensions. Then come visit us at Green Stone! We'll help you make the right product and design choices for your new fire pit!

*More essential project information on back* ►

## Tools & Materials

### Tools for this project include:

- Shovel
- Wheelbarrow
- Hard Rake
- Hand Tamp or Plate Compactor
- Level

### Materials for this project:

Every fire pit is different. Whether circling a rustic fire pit with boulders or creating a formal masonry structure, we have the stone for your project.

## Coverage Calculations:

Fire pit material coverage depends on the stone you choose and the size of the fire pit structure.

We can help you calculate the amount of stone you need based on your fire pit design and dimensions.
